**Attitudes towards English in Europe** Andrew Linn 2015-07-24 The status of English in Europe is changing, and this book offers a series of studies of attitudes to English today. Until recently English was often seen as an opportunity for Europeans to take part in the global market, but increasingly English is viewed as a threat to the national languages of Europe, and the idea that Europeans are equally at home in English is being challenged. This book will appeal to anyone interested in global English.

**Founders without Limits** Bobby V. Reddy 2021-11-11 Big Tech has flourished on the US public markets in recent years with numerous blue-chip IPOs, from Google and Facebook, to new kids on the block such as Snap, Zoom, and Airbnb. A key trend is the burgeoning use of dual-class stock. Dual-class stock enables founders to divest of equity and generate finance for growth through an IPO, without losing the control they desire to pursue their long-term, market-disrupting visions. Bobby Reddy scrutinises the global history of dual-class stock, evaluates the conceptual and empirical evidence on dual-class stock, and assesses the approach of the London Stock Exchange and ongoing UK regulatory reforms to dual-class stock. A policy roadmap is presented that optimally supports the adoption of dual-class stock while still protecting against its potential abuses, which will more effectively attract high-growth, innovative companies to the UK equity markets, boost the economy, and unleash the true potential of 'founders without limits'.

**Communication Between Cultures** Larry A. Samovar 2016-01-01 Packed with current research and examples, bestselling COMMUNICATION BETWEEN CULTURES, 9E equips readers with a deep understanding and appreciation of different cultures while helping them develop practical communication skills. Part I introduces the study of communication and culture; Part II focuses on the ability of culture to shape and modify our view of reality; Part III puts the theory of intercultural communication into practice; and Part IV converts knowledge into action. This is the only text to consistently emphasize religion and history as key variables in intercultural communication. Compelling examples help readers examine their own assumptions, perceptions, and cultural biases—so they can understand the subtle and profound ways culture affects communication. The ninth edition offers expanded discussions of the impact of globalization, a new chapter on intercultural communication competence, and more coverage of new technology. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Asia in International Relations** Pinar Bilgin 2017-02-01 Asia in International Relations decolonizes conventional understandings and representations of Asia in International Relations (IR). This book opens by including all those geographical and cultural linkages that constitute Asia today but are generally ignored by mainstream IR. Covering the Indian subcontinent, Turkey, the Mediterranean, Iran, the Arab world, Ethiopia, and Central-Northeast-Southeast Asia, the volume draws on rich literatures to develop our understanding of power relations in the world's largest continent. Contributors "de-colonize", "de-imperialize", and "de-Cold War" the region to articulate an alternative narrative about Asia, world politics, and IR. This approach reframes old problems in new ways with the possibility of transforming them, rather than recycling the same old approaches with the same old "intractable" outcomes.

The Century of the Emerging World Paul Dobrescu 2017-05-11 This book explores how the first decade of the 21st century was nothing short of "les années folles". The impressive growth rate of emerging economies changed the crisis-ridden world in a very short time, and in the early 2000s the emerging world's weight in the global economy was 38%, now 50%. This statistic confirms the political reality of the century of the emerging world. The monograph shows that the long-term tendencies inaugurated during this decade represent a silent revolution, as significant as the fall of the Berlin Wall and the collapse of the Soviet Union, and this will lead to a geopolitical reconfiguration hard to envision right now.

The Oxford Handbook of Diversity in Organizations Regine Bendl 2015-11-12 In recent years diversity and its management has become a feature of modern and postmodern organizations. Different practices have spread around the globe focusing on the organizing and management of inclusion and exclusion of different groups such as men and women, heterosexual and homosexuals, persons with different racial and ethnic background, ages, and (dis)abilities. However, although increasingly recognized as important, the discourses of diversity are multifaceted and not without controversy. Furthermore, diversity management practices have the potential to reproduce both inclusion and exclusion. This book presents the foundations of organizing and managing diversities, offers multidisciplinary, intersectional, and critical analyses on key issues, and opens up fresh perspectives in order to advance the diversity debate. The contributors are a team of leading diversity scholars from all over the world.

*The Inequality Machine* Paul Tough 2021-03-04 'Indelible and extraordinary, a powerful reckoning with just how far we've allowed reality to drift from our ideals.' Tara Westover, New York Times Book Review We're told that universities are our greatest driver of social mobility. But it's a lie. *The Inequality Machine* is a damning exposé of how the university system ingrains injustice at every level of American society. Paul Tough, bestselling author of *How Children Succeed*, exposes a world where small-town colleges go bust, while the most prestigious raise billions every year; where overstretched admissions officers are forced to pick rich candidates over smart ones; where black and working-class students are left to sink or swim on uncaring campuses. Along the way, he uncovers cutting-edge research from the academics leading the way to a new kind of university - one where students succeed not because of their background, but because of the quality of their minds. The result is a call-to-arms for universities that work for everyone, and a manual for how we can make it happen. 'Humanizes the process of higher education . . . Fascinating stories about efforts to remediate class disparities in higher education' New Yorker

*University Trends* Jonathan Coulson 2014-09-15 A university campus is a place with special resonance: conjuring images of cloistered quadrangles and wood-paneled libraries, often echoing centuries of scholarly tradition. And yet it is also a place of cutting-edge science, interactive learning, youth, vibrancy, and energy. It is this dual nature which makes the physical environment of a university so dynamic as well as a highly challenging landscape to design and manage successfully. Today, the scale of the pressures and the rate of change facing higher education institutions are greater than ever.? Squeezed public spending, rising tuition fees and the growing education ambitions of developing nations are set against a backdrop of rapid technological progress and changing pedagogies. What are the repercussions for the physical realities of university planning and architecture? And how are university campuses adapting to contend with these pressures? *University Trends* introduces the most significant, widespread and thought-provoking trends in campus design today. Part 1 identifies current trends such as starchitecture, large-scale campus extensions, adaptive re-use, and international branch campuses. Part 2 profiles each trend via highly-illustrated, global case studies of well-publicised as well as lesser-known projects. The essential guide to current and future trends in campus design.

*Asylum - A Right Denied* Helen O'Nions 2016-04-15 In recent decades, asylum has emerged as a highly politicized European issue. The term 'asylum seeker' has suffered a negative perception and has been associated with notions of illegality and criminality in mainstream media. These misconceptions have been supported by politicians as a distraction from economic and political uncertainties with the result that asylum seekers have been deprived of significant rights. This book examines the effect of recent attempts of harmonization on the identification and protection of refugees. It considers the extent of obligations on the state to admit and protect refugees and examines the 1951 Refugee Convention. The motivations of European legislators and legislation concerning asylum procedures and reception conditions are also analysed. Proposals and initiatives for refugee movements and determinations are examined and assessed. The author makes suggestions for better protection of refugees while responding to the security concerns of States, and questions whether European law and policy is doing enough to uphold the fundamental right to seek and enjoy asylum as set out in the Universal Declaration of Human Rights. This book takes a bold look at a controversial issue and generates discussion for those involved in the fields of human rights, migrational and transnational studies, law and society and international law.

*Life in Schools* Peter McLaren 2015-11-17 This new edition brings McLaren's popular, classic textbook into a new era of Common Core Standards and online education. The book is renowned for its clear, provocative classroom narratives and its coverage of political, economic, and social factors that are undervalued in other educational textbooks. An international committee of experts ranked *Life in Schools* among the top twelve education books in the world.

Grounds for Difference Rogers Brubaker 2015-03-09 Offering fresh perspectives on perennial questions of ethnicity, race, nationalism, and religion, Rogers Brubaker analyzes three forces that shape the politics of diversity and multiculturalism today: inequality as a public concern, biology as an asserted basis of racial and ethnic difference, and religion as a key terrain of public contestation.

Muslim Fashion Reina Lewis 2015-08-31 In the shops of London's Oxford Street, girls wear patterned scarves over their hair as they cluster around makeup counters. Alongside them, hip twenty-somethings style their head-wraps in high black topknots to match their black boot-cut trousers. Participating in the world of popular mainstream fashion—often thought to be the domain of the West—these young Muslim women are part of an emergent cross-faith transnational youth subculture of modest fashion. In treating hijab and other forms of modest clothing as fashion, Reina Lewis counters the overuse of images of veiled women as "evidence" in the prevalent suggestion that Muslims and Islam are incompatible with Western modernity. Muslim Fashion contextualizes modest wardrobe styling within Islamic and global consumer cultures, interviewing key players including designers, bloggers, shoppers, store clerks, and shop owners. Focusing on Britain, North America, and Turkey, Lewis provides insights into the ways young Muslim women use multiple fashion systems to negotiate religion, identity, and ethnicity.

Shadow Education and Social Inequalities in Japan Steve R. Enrich 2017-12-07 This book examines why Japan has one of the highest enrolment rates in cram schools and private tutoring worldwide. It sheds light on the causes of this high dependence on 'shadow education' and its implications for social inequalities. The book provides a deep and extensive understanding of the role of this kind of education in Japan. It shows new ways to theoretically and empirically address this issue, and offers a comprehensive perspective on the impact of shadow education on social inequality formation that is based on reliable and convincing empirical analyses. Contrary to earlier studies, the book shows that shadow education does not inevitably result in increasing or persisting inequalities, but also inherits the potential to let students overcome their status-specific disadvantages and contributes to more opportunities in education. Against the background of the continuous expansion and the convergence of shadow education systems across the globe, the findings of this book call for similar works in other national contexts, particularly Western societies without traditional large-scale shadow education markets. The book emphasizes the importance and urgency to deal with the modern excesses of educational expansion and education as an institution, in which the shadow education industry has made itself (seemingly) indispensable.

The Test Anya Kamenetz 2015-01-06 "[The anti-testing] movement now has a guidebook. . . . Kamenetz shows how fundamentally American it would be to move toward a more holistic system." -- New York Times Book Review The Test is an essential and critically acclaimed book for any parent confounded by our national obsession with standardized testing. It recounts the shocking history and tempestuous politics of testing and borrows strategies from fields as diverse as games, neuroscience, and ancient philosophy to help children cope. It presents the stories of families, teachers, and schools maneuvering within and beyond the existing educational system, playing and winning the testing game. And it points the way toward a hopeful future of better tests and happier kids.

*Handbook on Class and Social Stratification in China* Yingjie Guo 2016-01-29 This comprehensive and interdisciplinary Handbook illustrates the patterns of class transformation in China since 1949, situating them in their historical context. Presenting detailed case studies of social stratification and class formation in a wide range of settings, the expert international contributors provide invaluable insights into multiple aspects of China's economy, polity and society. The Handbook on Class and Social Stratification in China explores critical contemporary topics which are rarely put in perspective or schematized, therefore placing it at the forefront of progressive scholarship. These include; • state power as a determinant of life chances • women's social mobility in relation to marriage • the high school entrance exam as a class sorter • class stratification in relation to health • China's rural migrant workers and labour politics. Eminently readable, this systematic exploration of class and stratification will appeal to scholars and researchers with an interest in class formation, status attainment, social inequality, mobility, development, social policy and politics in China and Asia.

The Education Invasion Joy Pullmann 2017-03-14 Most Americans had no idea what Common Core was in 2013, according to polls. But it had been creeping into schools nationwide over the previous three years, and children were feeling its effects. They cried over math homework so mystifying their parents could not help them, even in elementary school. They read motley assortments of "informational text" instead of classic literature. They dreaded the high-stakes tests, in unfamiliar formats, that were increasingly controlling their classrooms. How did this latest and most sweeping "reform" of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers, and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K-12 classes, and how the Obama administration pressured states to adopt them. Thus a federalized education scheme took root, despite legal prohibitions against federal involvement in curriculum. Common Core and its testing regime were touted as "an absolute game-changer in public education," yet the evidence so far suggests that kids are actually learning less under it. Why, then, was such a costly and disruptive agenda imposed on the nation's schools? Who benefits? And how can citizens regain local self-governance in education, so their children's minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats? The Education Invasion offers answers and remedies.

Talent Tyler Cowen 2022-05-17 The art and science of talent search: how to spot, assess, woo, and retain highly talented people. How do you find talent with a creative spark? To what extent can you predict human creativity, or is human creativity something irreducible before our eyes, perhaps to be spotted or glimpsed by intuition,

but unique each time it appears? Obsessed with these questions, renowned economist Tyler Cowen and venture capitalist and entrepreneur Daniel Gross set out to study the art and science of finding talent at the highest level: the people with the creativity, drive, and insight to transform an organization and make everyone around them better. Cowen and Gross guide the reader through the major scientific research areas relevant for talent search, including how to conduct an interview, how much to weight intelligence, how to judge personality and match personality traits to jobs, how to evaluate talent in online interactions such as Zoom calls, why talented women are still undervalued and how to spot them, how to understand the special talents in people who have disabilities or supposed disabilities, and how to use delegated scouts to find talent. Talent appreciation is an art, but it is an art you can improve through study and experience. Identifying underrated, brilliant individuals is one of the simplest ways to give yourself an organizational edge, and this is the book that will show you how to do that. Talent is both for people searching for talent and for those who wish to be searched for, found, and discovered.
