[On Religion](#) Karl Barth 2006-11-01 The study Karl Barth has generally been excluded from religious studies departments in favour of more liberal theologians such as Tillich. For many years scholar Garrett Green has argued that there is no justification for this neglect. To support his theory that Barth can and should be studied as a religious theorist rather than just a theologian Garrett Green presents a brand new translation of Chapter 17 of Karl Barth's Church Dogmatics prefaced by a detailed introduction to the text. This important new translation counters the idea that Barth rejected the notion of religion hand by correcting a number errors in the original version which obscure Barth's central argument. In particular the crucial word, Aufhebung, in the title is translated here as sublimation rather than abolition. The translation will do better justice to German original and will be more accessible to contemporary readers. Unlike the original version, all Greek, Latin and Hebrew citations are translated into English, and the NRSV is used for the Bible quotes rather than the King James. The translation is accompanied by a text by Garrett Green introducing the scholar and student to Barth as a religious theorist. The book concludes with appendices containing teaching materials and a summary of developed by the author in the classroom over years.

Culture, Self, and Motivation Avi Kaplan 2009-07-01 The authors of the chapters in this volume—past and present collaborators of Marty Maehr, and a few of his former graduate students along the years—are motivational researchers who conduct research using diverse methods and perspectives, and in different parts of the world. All, however, see their intellectual roots in Marty's theoretical and empirical work. The chapters in this book are divided into two sections: Motivation and Self and Culture and Motivation. Clearly, the distinctions between these two sections are very blurry, as they are in Marty's work. And yet, when the authors were asked to contribute their chapters, the research questions they addressed seemed to have formed two foci, with personal motivation and socio-cultural processes alternating as the core versus the background in the two sections.

The Composting Handbook expands on previously available resources by incorporating new information, new subjects and new practices, drawing its content from current scientific principles, research, engineering and industry experience. In both depth and breadth, it covers the knowledge that a compost producer needs to succeed. Topics include the composting process, methods of composting, equipment, site requirements, environmental issues and impacts, business knowledge, safety, and the qualities, uses and markets for the compost products. The Composting Handbook is an invaluable reference for composting facility managers and operators, prospective managers and operators, regulators, policy makers, environmental advocates, educators, waste generators and managers and generally people interested in composting as a business or a solution.
